Notification of Asbestos 6-Month Surveillance

TO: Parents and Staff
FROM: West Milford Board of Education
Date: June 27, 2017

In compliance with the U.S. Environmental Protection Agency (EPA) Asbestos Hazard Emergency Response Act (AHERA), each school within the district has had an initial inspection performed to determine the presence and condition of Asbestos Containing Materials (ACM). Re-inspections have been performed every three years along with biannual periodical surveillances of all ACM. In May, 2017, a 6-Month Surveillance Inspection was done at your school.

The results of the 6-month surveillance inspection are on file in your school's main office. You are welcome to schedule an appointment to view these files during normal school hours. If you have specific questions regarding asbestos management in our schools, please contact the Buildings and Grounds Department at 973-697-1700 x5071.
