Local School System: Board of Education of Baltimore County

Period Ending November 30, 2006 (report due to MSDE by December 31, 2006)

Report on Variances of More Than 10%

As of November 30, 2006, 42% of the fiscal year has elapsed and 30% of the 10-month school year has elapsed. The attached report shows that 37% of revenues have been received and that 39% of the expenditures have been incurred as of November 30, 2006. The overall activity reported is in line with the percentage of the school year completed. There are a number of categories for which revenues received are not in line with the percent of the year completed; and where estimated expenditures for the year have been encumbered and once a year expenditures have been made. Therefore, these categories were higher or lower than the applicable percentage required. The following information is provided to explain these variances.

REVENUES

Local Appropriation:

The school board draws county funds based on actual year-to-date expenditures. As of November 30th, year-to-date actual expenditures were 39% of the total budget, and $173 million of the $606 million appropriated for the board had been received.

Other Local Revenue:

This category includes budgeted amounts for various tuition revenues, universal service fee rebates and sundry revenues. As of November 30th, most of the tuition revenues (i.e. summer school) have been received, as well as $1.8 million of service fee rebates and sundry revenues. We have not received the out of county living arrangement payments due from other local education agencies, which is budgeted at $4 million and is generally received at year end.

Other Resources:

This category represents the re-appropriation of prior year fund balance. The Board budgeted and received approval from the Baltimore County Council to utilize $4.1 million of the prior year’s fund balance, which was recorded as revenue by November 30th.

OBLIGATIONS (EXPENDITURES AND ENCUMBRANCES)

203 Instructional Salaries:

As anticipated, Instructional Salaries are 30% expended as of November 30, 2006. This represents the salaries paid to direct teaching personnel. These salaries generally are paid beginning in late summer and continue on to the end of the school year. As the school year is only three months completed, the 30% of salaries recognized is consistent with the percent of the school year elapsed.

204 Textbooks and Instructional Supplies

A significant portion of the Textbooks and Instructional Supplies category is spent early in the fiscal year as orders are placed with vendors for textbooks and classroom supplies needed for the opening of school. It was anticipated that our percentage spent in this category would be high at this point in the fiscal year.

208 Health Services:

As anticipated, Health Services are 31% expended/obligated as of November 30, 2006. This category represents the costs of providing health services in all schools. The salaries budget in this category represents 98% of the total budget for this area. Health services personnel are generally employed on a 10-month basis and the expenditures to date approximate the percent of the school year that has been completed.

209 Student Transportation

This category includes all costs associated with providing school transportation services for students between home, school and school activities. Much of the transportation non-salary budget of $16.6 million is obligated early in the fiscal year to reflect the anticipated annual expenditures for private bus contractors, fuel for vehicles and cost of bus maintenance.

210 Operation of Plant:

The Operation of Plant category includes all utilities costs, facility rent, and insurance premiums. Every year these are fully encumbered at the beginning of the year. Therefore, $27.4 million has been expended/encumbered for these costs as of November 30, 2006. The category is 68% expended/obligated. At the same time last year, 66% of the category was expended.

212 Fixed Charges:

This category includes employee benefits, payroll taxes and other fixed costs. A significant amount of these costs are related to expenditures for 10 month employees and therefore these costs are in line with the percentage of the school year that has been completed.

215 Capital Outlay

The Capital Outlay category includes expenditures related to the acquisition of land, buildings and equipment. Capital expenditures to date included $600,000 for the purchase of portable classrooms to provide facilities for the expansion of all day kindergarten programs, and $1.3 million for the completion of the window replacement project at one of our elementary schools. Both of these expenditures have been obligated at November 30th and they account for 81% of the $2.3 million in non-salary expenditures in this category.
