STUDENTS: Services to Students

Life-Threatening Medical Emergencies

All students will be provided with immediate first aid and 911 emergency rescue services when an injury, medical crisis or life-threatening episode occurs at school. Cardiopulmonary Resuscitation (CPR) or emergency airway management is to be administered to any indicated student per American Heart Association guidelines. There will be two qualified personnel in each school who are certified in cardiopulmonary resuscitation and first aid; one of these must be the registered nurse-school nurse. If the attending physician of a terminally ill child has entered a Do Not Resuscitate order on the authorization of the child's parents, school administrators must act in accordance with the order and refrain from medical interventions that are not consistent with it.
