
Board of Education President's Report

May 10, 2011

Purpose: The Board is continually asked questions concerning many areas of our educational system. They come from public testimony, inquires to Board members, public hearings on capital and operating budgets, and area advisory councils. Some are local to individual schools, while others cross the system. Each month during this portion of our meeting, I will provide a report which will be in response to some public concerns that Board members have become aware of. My responses will not address personnel, legal, or confidential matters.

Public Comment

Issue: Policy and Rule 1300

Response: The Board of Education requested the Superintendent to have staff review the policy and rule and consider changes that would assist in making school buildings more accessible for community groups. The revised policy is being reviewed by the Board of Education's Policy Review Committee on May 16, 2011.
