

Using Google Meet with the Schoology App on Mobile Devices: iOS and Android

Students may choose to use their mobile device for joining their teacher's Google Meet.

You will need to download the **Hangouts Meet by Google app** to use Google Meet with your teacher on your mobile device. Download the free app and enter your BCPS credentials for Google:

- Your BCPS username + the @bcps.org username@bcps.org
- **Select G-suite...** NOT Personal Account
- Your BCPS password
- Allow the app to use your microphone when prompted

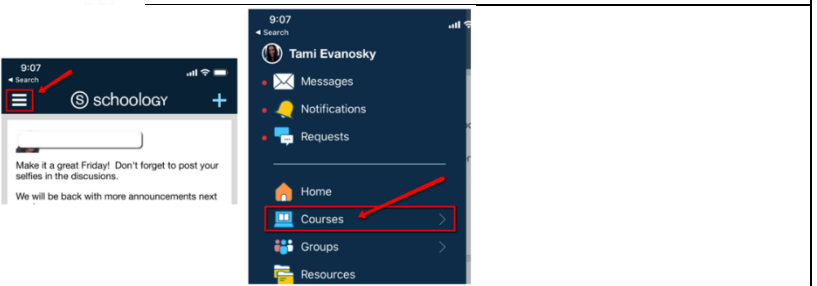

*NOTE: It is recommended that you allow your **Microphone enabled** when prompted in order for you to participate in the Meet. You may choose to keep your Camera disabled. These can be adjusted later in Google settings.*

Go to the Schoology Mobile App installed on your device. *(See instructions for downloading the App for iOS and Android Devices.)*

Go into your Course (using the hamburg navigation menu at the top left) and locate your teacher's code for their Google Meet. It will be the "nickname" or code for the meeting room.

Note for iOS users: If your teacher has the Google Meet generic link on their Schoology page, selecting that should take you directly to the app. iOS devices will show a prompt to enter OPEN Hangout Meet. Make sure the box is checked for "Save my place in the app" so that the link goes directly the Meet app on your mobile device.

If the teacher has directly linked the meet to the nickname/code, clicking the link will take you into the Meet. Select Join Meet.

If your teacher has not linked the Meet, go to your Meet app and select Meeting Code. When prompted, enter your teacher's Meet nickname/code and select Join Meeting.
